FULL STACK/JAVA FULL STACK TASK - 01

Task 1: Landing Page Development

Objective

Create a **simple, responsive, and visually appealing** landing page using **HTML and CSS**, featuring a **hero section, dropdown navigation, key features, and a footer**.

Project Steps

1. Create the HTML Structure

- **Basic Setup:**
    - Use a standard **HTML5 structure** with <html>, <head>, and <body>.
- **Header:**
    - Add a **website logo**.
    - Implement a **navigation bar** with dropdown menus (e.g., "Features," "Services").
- **Hero Section:**
    - Include a **large heading**, a **short description**, and a **call-to-action (CTA) button** like **"Get Started"**.
- **Features Section:**
    - Display **key product or service features** with brief descriptions.
- **Footer:**
    - Include **copyright information, privacy policy, and terms of service**.

---

2. Add Content

- Use **headings (<h1>, <h2>)** and **paragraphs (<p>)** for a **clear content structure**.
- Implement **navigation links** and an easy-to-spot **CTA button**.
- Add **relevant images** (e.g., a **background image** for the hero section) to enhance the design.

---

3. Implement Dropdown Navigation

- **Dropdown Menus:**
    - Include a **hover/click-based dropdown menu** in the navigation for sections like **"Features" or "Services"**.
- **CSS Styling for Dropdowns:**
    - Ensure the **submenu appears smoothly** on hover or click.

4. Apply Basic CSS Styling

- **Font Styling:**
  - Use a **clean, readable font** with a **hierarchy** for headings, subheadings, and body text.
- **Color Scheme:**
  - Choose a **modern and visually appealing** palette.
- **Spacing & Layout:**
  - Use **margins, padding, flexbox, or grid** to maintain a **well-structured layout**.
- **Responsive Design:**
  - Implement **media queries** to ensure **mobile-friendliness**.

5. Enhance the Navigation Experience

- Ensure **navigation is easy to use** on both **desktop and mobile**.
- Improve **clickability and tap-friendliness** for links.
- Add **hover effects** for a **smooth user experience**.

Expected Outcome

✅**A fully responsive and interactive landing page**.
✅**Dropdown navigation for enhanced user interaction**.
✅**A well-structured, visually appealing layout with clear CTAs**.

Would you like additional features such as animations or a contact form? 😊
